

UX SERVICE

*Do you have a software idea, but you are not sure if it's worth of developing?
If the answer is yes, order Rento to the rescue and we will
facilitate a workshop to find it out!*

1. Pre-study

~2h meeting to go through your idea based on business processes.

Workshop preparations: schedule, agenda

2. Workshop

A 1-3 day workshop in your premises with all key-persons to work on your idea. We will:

- review your software idea in detail
- build a prototype using frequent iterations together with the workshop-team
- wrap-up the workshop and agree about next steps

The prototype and documented notes

3. Final report

We will provide a final report about the workshop

- lessons learnt
- things to note and consider
- decisions

Report walk-through and prototype delivery

4. UI/UX manual

A UI / UX manual can be ordered as an additional service. The UI / UX manual helps developers to effortlessly build the same design and usability as the prototype planned in the workshop. The manual works as a base for a future software project.

Manual

Benefits of the service:

- + Ensures that your software idea is functional
- + Offers early involvement of all the parties needed
- + Gives clarity of the necessary functionalities of the software
- + Enables designing the user experience together with key-people
- + Allows accurate estimates to be made of the work-effort needed
- + Eases the technical start of the project
- + Enables early phase and hands-on communication for stakeholders
